Updated Tables

- **Questionnaire gives you the opportunity to keep or get new default tables for:**
 - **Unicode tables**
 - **error_Ing**
 - **check_doc_line,
check_doc_006,007,008 (to reflect new
MARC21 changes**

We have made few changes to those tables so we opted to get the new ones

| the field is manipulated for display in Brief Table view.
****
| The use of Column 3 is as follows:|
| [display_tag, display_filters, subfield to filter on, contents
| to filter for, edit-field indicator,]
| The parameters are separated by commas.
|
| Examples for Column 3:      856##, .y,*,Y,

|
| In this example, the 856 field is the basis for display.
| The edit_field formatting that will be used
| depends on the presence or absence of $$y in the 856 field.
| The program will display the 856 field if
| the 856 field has subfield y with any data (*). If it does,
| "Y" is used for matching Col.4 (ID of edit_field line) in
| the library's edit_field table. If the 856 field does not contain
| subfield y (-), the "U" is used for matching Col.4 in edit_field.

Conflicting headings

Fix_doc_aut_duplicate

This fix_doc is included in 16.02 and is designed to deal with conflicting headings in the authority file.

This fix_doc recognizes that the 4xx ALA is also used as a 4xx in another record. It creates \$7's with the 1xx to make the heading unique.

There are still some problems with this fix_doc.

While testing, I brought in some bib records with the subject heading of "Sin"
