# Social software and libraries

Abstract:

What is social software? What implications does it have for libraries? Clay Shirky, who is largely credited with creating the term, defines social software as “software that supports group interaction.”

Some examples include instant messaging, RSS, blogs, wikis, folksonomies (tagging), photo sharing, social bookmarking, and more.

The presentation will start with an overview of some of these social software technologies and their applications in libraries. The presenters will discuss current and future implications of social software for librarians, library systems, and library services.

# Social software

- “Software that supports group interaction.” -- Clay Shirky (ETech Conference, 2003)
  - » [www.shirky.com/writings/group\\_enemy.html](http://www.shirky.com/writings/group_enemy.html)
- Collaborative
- Leverages “wisdom of the crowds” or “hive mind”
- “People are in fact kind of a killer app” -- Tim O’Reilly
  - » [www.pcworld.com/news/article/0,aid,114855,00.asp](http://www.pcworld.com/news/article/0,aid,114855,00.asp)
- Low-barrier to use and adoption
- “Open” (can be expanded, linked, mashed, etc.)
- Foster and support “community”
- Fun, social, entertainment, lifestyle ...

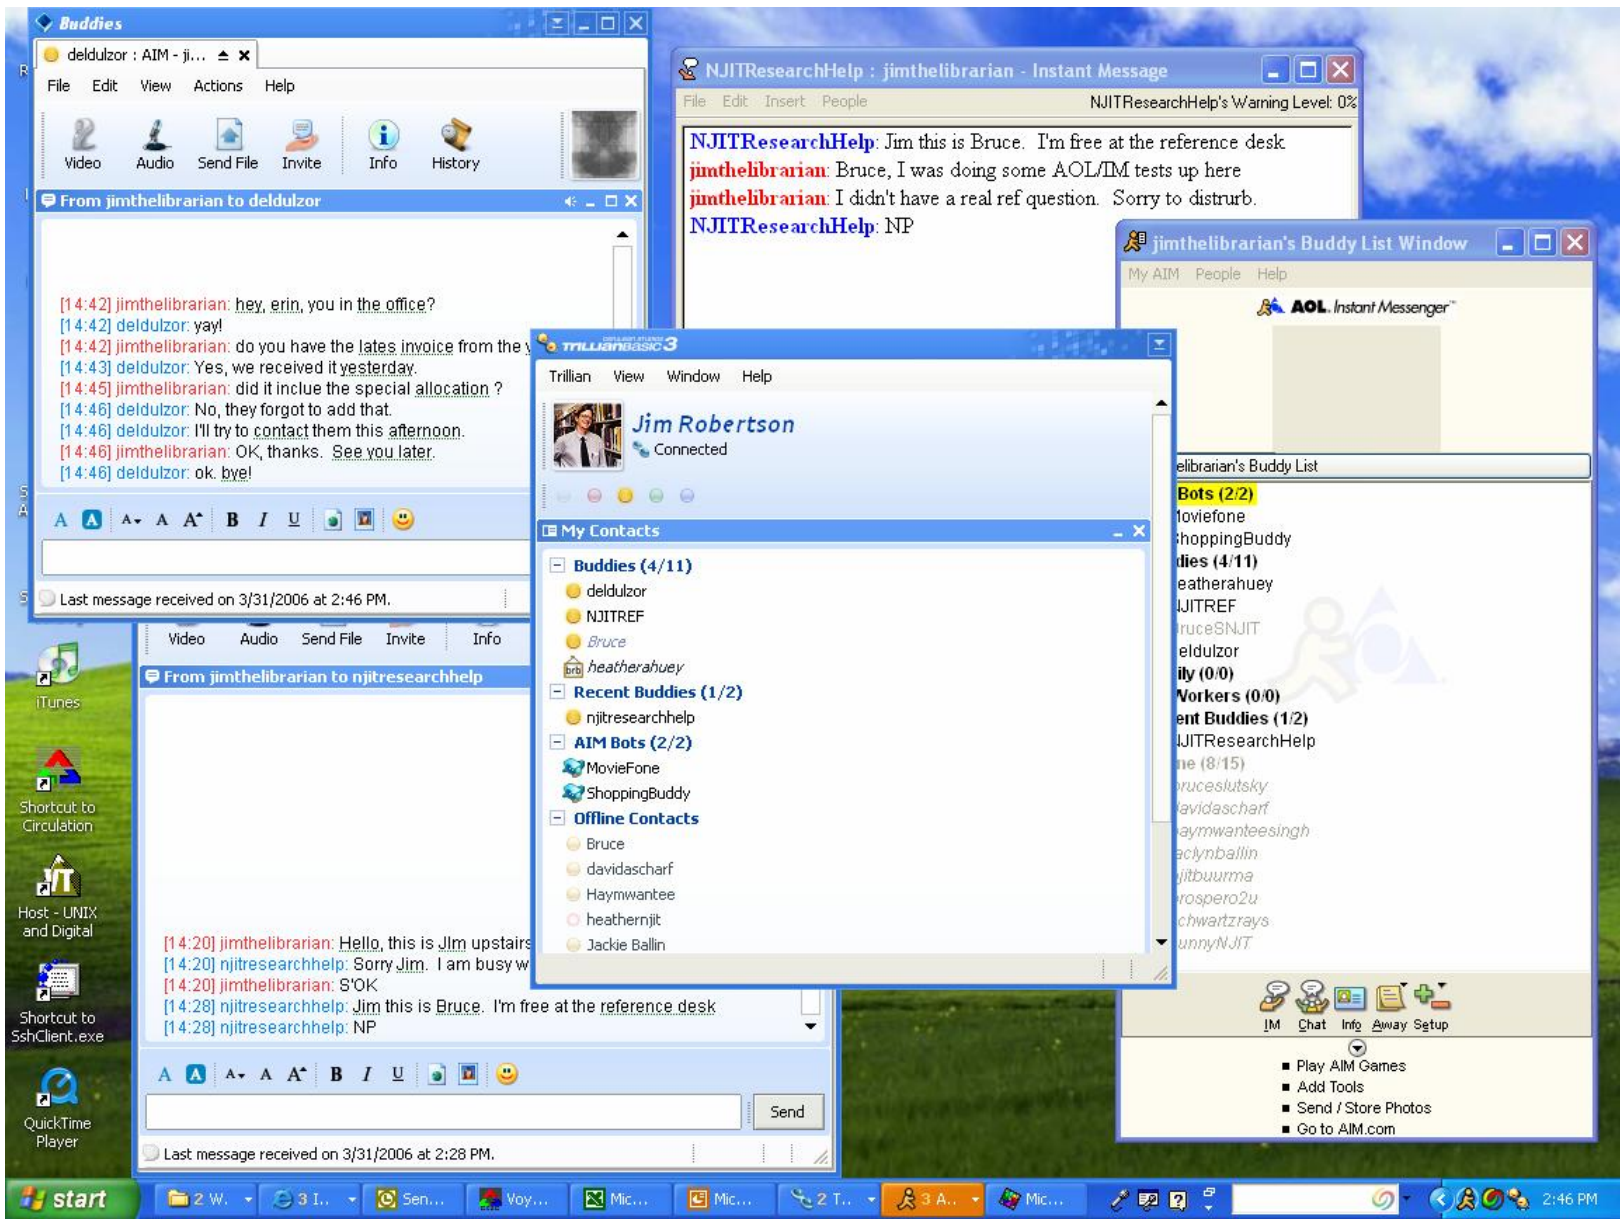

# Social software

- a tool (for augmenting human social and collaborative abilities)
- a medium (for facilitating social connection and information interchange)
- an ecology (for enabling a "system of people, practices, values and technologies in a particular local environment")
  - » <http://www.educause.edu/er/erm05/erm0513.asp>

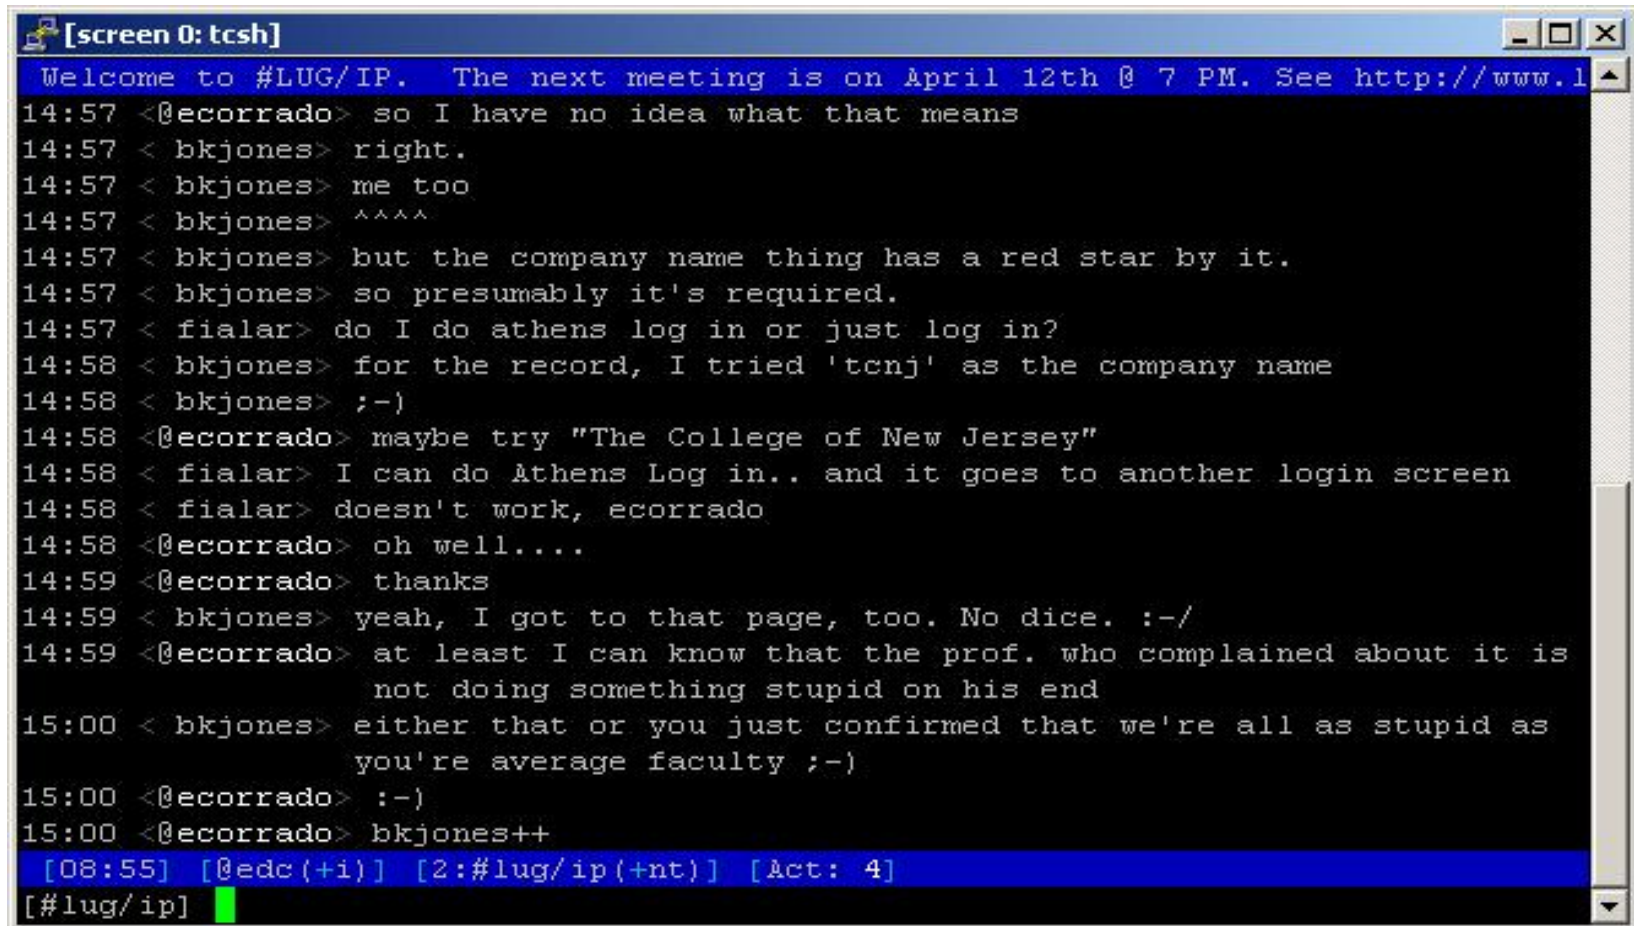

# Instant messaging and IRC

- IRC: Internet Relay Chat
- Low-barrier
- Interactive
- Can be instantaneous
- Local (and/or web-based clients)
- Usually relies on outside entities to host service (Yahoo!, AOL, Freenode, etc.)
- Can be logged
- Possible firewall issues (esp. with IRC)

# Instant messaging and IRC

# Instant messaging and IRC

```
[screen 0: tcsh]
Welcome to #LUG/IP.  The next meeting is on April 12th @ 7 PM.  See http://www.1
14:57 <@ecorrado> so I have no idea what that means
14:57 < bkjones> right.
14:57 < bkjones> me too
14:57 < bkjones> ^^^^
14:57 < bkjones> but the company name thing has a red star by it.
14:57 < bkjones> so presumably it's required.
14:57 < fialar> do I do athens log in or just log in?
14:58 < bkjones> for the record, I tried 'tcnj' as the company name
14:58 < bkjones> ;-)
14:58 <@ecorrado> maybe try "The College of New Jersey"
14:58 < fialar> I can do Athens Log in.. and it goes to another login screen
14:58 < fialar> doesn't work, ecorrado
14:58 <@ecorrado> oh well....
14:59 <@ecorrado> thanks
14:59 < bkjones> yeah, I got to that page, too. No dice. :-/
14:59 <@ecorrado> at least I can know that the prof. who complained about it is
        not doing something stupid on his end
15:00 < bkjones> either that or you just confirmed that we're all as stupid as
        you're average faculty ;-)
15:00 <@ecorrado> :-)
15:00 <@ecorrado> bkjones++
[08:55] [@edc(+i)] [2:#lug/ip(+nt)] [Act: 4]
[#lug/ip]
```

# Instant messaging and IRC – library implications

- Instant Messaging often used for “Virtual Reference”
- IRC can be used for online meetings and planning. For example, the recent Code4lib conference was mostly planned over IRC
- IRC channels can be good place to go to ask for help from colleagues from other institutions (especially useful for lone systems librarians)
- “Under the radar” back-channel communications during conferences

» [en.wikipedia.org/wiki/Backchannel](http://en.wikipedia.org/wiki/Backchannel)

# Instant messaging and IRC – library implications

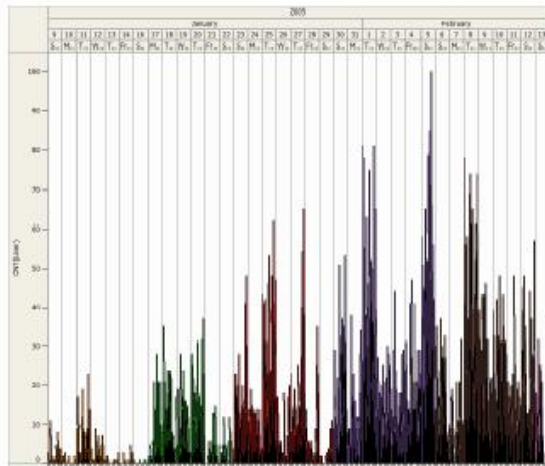

Figure 2. Number of Chat Entries Over First Six Weeks of Spring 2005 Academic Semester

figure 2. Backchannel presentation

# Blogs

- Weblogs = blogs
- Low-barrier
- Time-oriented (“diary”)
- Commentable
- Trackback / pingback features (weaves together the “blogosphere”)
- Syndicable
- Subscribe-able
- Discrete and addressable “chunks” and threads of conversations (allows for “distributed conversation”)
- Freeware and commercial
- Locally installed and hosted
- Some more popular “commercial” blog host ads

## IdM Takes Lessons From the Microformats Crowd

Thursday, March 30th, 2006

A tip from Ryan sent me looking at MicroID: a new Identity layer to the web and Microformats that allows anyone to simply claim verifiable ownership over their own pages and content hosted anywhere. The idea is to hash a user's email address (or other identifier) with the name of the site it will be published on, [...]

## The reader and OpenWorldCat

[Books, movies and reading ...](#), [Metadata](#), [OCLC](#), [Social networking](#)

Well, it has arrived! Functionality has gone live in OpenWorldCat which allows us to incorporate user views of materials. Check out the details and reviews tab [here](#), for example.

We do not know how this will develop: we think it is really important to provide a central presence on the web where libraries and readers can engage in a conversation about books and other materials. We hope that this engages readers and libraries, and that we can collaboratively create something that it would be impossible for parties to create individually. Try it!

On a side-note, I especially like this initiative because it is another example of a collaboration between my research and production colleagues.

[Note: I originally used the *Wiki* word in the title of this post, because the underlying technology is Wiki-based - supporting Wiki-like functionality over structured data - and we use Wiki-like markup. However, we use it here to support a different type of application. In my excited rush to talk about it, I should have remembered this! Thanks to commenters.]

Update: here is a direct link to a review:

Maybe it's me, but I don't see it. Wiki functionality is where?

Too me it looks more like the things you can do on Amazon.com, and I've never heard them calling it a wiki.

Btw, having to fill out a registration form with 10+ fields on it doesn't make it really appealing to join in...

**What Is Web 2.0**  
Design Patterns and Business Models for the Next Generation of Software  
by [Tim O'Reilly](#)  
09/30/2005

The bursting of the dot-com bubble in the fall of 2001 marked a turning point. Many people concluded that the web was overhyped, when in fact [bubbles and shakeouts appear to be a common feature of all technological revolutions](#). Sh typically mark the point at which an ascendant technology is ready to take its stage. The pretenders are given the bum's rush, the real success stories show strength, and there begins to be an understanding of what separates one fr

The concept of "Web 2.0" began with a conference brainstorming session between O'Reilly and MediaLive International. Dale Dougherty, web pioneer and O'Reilly VP, noted that far from having "crashed", the web was more important than ever, with exciting new applications and sites popping up with surprising regularity. What's more, the companies that had survived the collapse seemed to have some things in common. Could it be that the dot-com collapse marked some kind of turning point for the web, such that a call to action such as "Web 2.0" might make sense? We agreed that it did,

# Nature blogs

The image shows a screenshot of a Microsoft Internet Explorer browser window. The main window displays the Nature Publishing Group website, which features a red header with the text "nature blogs" and a navigation menu. Below the header, there are several blog categories listed with icons: "THE SCEPTICAL CHYMIST" (Chemistry Blog), "ACTION POTENTIAL" (The Nature Neuroscience Blog), "FREE ASSOCIATION" (The Nature Genetics Blog), "NASCENT" (Nature's blog on web technology and science), and "NATURE NEWSBLOG" (A forum providing readers with the opportunity to comment on stories published on news@nature.com).

The second browser window, titled "Action Potential: New NN papers (published online February 26th)", shows a specific blog post. The post title is "New NN papers (published online February 26th)". The author is Annette Markus, and the post date is February 28, 2006. The post content includes a list of papers: Otten et al., [Brain activity before an event predicts later recollection](#); Tsankova et al., [Sustained hippocampal chromatin regulation in a mouse model of depression and antidepressant action](#); and Williams & Eskandar, [Selective enhancement of associative learning by microstimulation of the anterior caudate](#). The post also includes a "TRACKBACK" section with a URL and a "COMMENTS" section with a single comment from a user named jimth...

The browser's address bar shows the URL [http://blogs.nature.com/nn/actionpotential/2006/02/new\\_nn\\_papers\\_published\\_online\\_6.html#comments](http://blogs.nature.com/nn/actionpotential/2006/02/new_nn_papers_published_online_6.html#comments). The browser's taskbar at the bottom shows the Windows Start button, several open applications, and the system clock displaying 2:26 PM.

### Today's featured article

**The Yom Kippur War** was fought from October 6 (the day of Yom Kippur) to October 26, 1973, between Israel and a coalition of Egypt and Syria. The war began with a surprise joint attack by Egypt and Syria into the Sinai and Golan Heights, respectively, which had been captured by Israel six years earlier during the Six-Day War. The Egyptians and Syrians advanced during the first 24–48 hours, after which momentum began to swing in Israel's favor. By the second week of the war, the Syrians had the south, the Israelis had struck at the "hinge" of the Canal (where the old cease-fire line had been cease-fire came into effect. The war had far had been humiliated by the lopsided defeat. War, felt psychologically vindicated by its way for the peace process that followed, as David Accords which came soon after led to any Arab country had recognized the Israeli Soviet Union, then left the Soviet sphere of

## Six-Day War

From Wikipedia, the free encyclopedia

The **Six-Day War** (Hebrew: מלחמת ששת הימים; transliteration: *Mikhemet Sheshet HaYamim*, Arabic: حرب الأيام الستة; transliteration: *Harb al-Ayam as-Sitta*), also known as the **1967 Arab-Israeli War**, **Six Days' War**, or **June War**, was fought between Israel and its Arab neighbors Egypt, Jordan, and Syria. Following Egypt's closure of the Straits of Tiran to Israeli shipping and the deployment of its troops in the Sinai near the Israeli border, and after months of increasingly tense border incidents and diplomatic crises, Israel launched what it described as a pre-emptive attack against Egypt. At its end, Israel controlled the Gaza Strip, the Sinai Peninsula, the West Bank, and the Golan Heights. The results of the war affect the geopolitics of the region to this day.

### Background

*Main article: Background to Six-Day War*

### Main reasons for the war

For Egypt, the 1956 Suez War was a military defeat but a victory for politics in those areas. Heavy diplomatic pressure forced Israel to withdraw its military from the Sinai Peninsula and the Gaza Strip. After the 1956 war, Egypt, although not Israel, agreed to the stationing of a UN peacekeeping force in the Sinai, UNEF, to keep that border region demilitarized, and prevent guerrillas from crossing the border into Israel. As a result the border between Egypt and Israel quieted for a while. The war's aftermath saw the region return to an uneasy balance without any real resolution of the region's difficulties. At the time, no Arab state had recognized Israel.

Syria began sponsoring guerrilla raids into Israel in the early 1960s as part of its "people's war of liberation", designed to deflect domestic opposition to the Baath Party. Israel and Syria also had an

**This article is being considered for deletion** in accordance with Wikipedia's [deletion policy](#).

Please share your thoughts on the matter at [this article's entry](#) on the [Articles for deletion](#) page.

You are welcome to edit this article, but please do not blank this article or remove this notice while the discussion is in progress. For more information, particularly on merging or moving the article during the discussion, read the [Guide to deletion](#).

If you create a new article, please do not add this notice to it. For more information, see [Wikipedia:Articles for deletion criteria](#).

[How to list a page for deletion](#)

[\[ Show \]](#)

As with [Robin Hunicke](#) above, this is a "vanity page created by a friend." Ph.D. student who does research in social networking, but no more notable than any successful Ph.D. student out there, "premiere researcher" or no. NTK 04:43, 8 April 2006 (UTC)

- **Delete** as nn. [Feezo](#) ([Talk](#)) 07:23, 8 April 2006 (UTC)
- **Delete** Non-notable biography, WP:Bio refers. [\[aeropagitica\]](#) ([talk](#)) 08:16, 8 April 2006 (UTC)
- **Keep** We already convened a panel of Wikipedians to discuss the relevancy on [Talk:Danah\\_boyd](#) three weeks ago. And her page survived that. Since then, Boyd appeared on the O'Reilly factor, on Fox News, to talk about the internet. So she's increasingly visible! Again, for the second time this Spring, keep. --JustinHall 20:11, 10 April 2006 (UTC)

Justin, there wasn't so much a "convened panel of Wikipedians", as just two or three people talking about the article since March 22 [1], which is a very different thing than the formal (and much more serious) Deletion Review process that's going on right now. Please, can you provide any proof about the Fox News appearance, like a link to her name on the Fox News site, or any other major press (CNN, MSNBC, BBC)? At the moment, I'm on the fence about her bio, but leaning towards "Delete", since the way that the bio is currently written, **Keep** reeks of a vanity article (please read the policies at [WP:VANITY](#)). The article has been trying to claim that Danah is amazingly famous, but if she's so famous, how come there's nothing in the article about her being mentioned in major news sites? So far, the way things look, is that this article is just by the word of her friends trying to claim that she's well-known, but trust me, that does *not* go over well among seasoned Wikipedia editors. Also, the obvious sockpuppet votes (see [WP:SOCK](#)) that are piling up below are not helping matters, since it's obvious to anyone who understands Wikipedia, that the votes of sockpuppet users, and as such, are near meaningless. Unless some serious credible evidence can be provided that Danah is genuinely well-known, I am going to vote "delete" myself. Please please read [Wikipedia:Notability \(people\)](#) and provide some solid credible proof about danah's fame. Otherwise, the article will go away until there is enough credible media attention to make it stick. --Elonka 18:14, 11 April 2006 (UTC)

Here is a link to a video of her Fox news appearance: <http://youtube.com/watch?v=DNfyw2KYHww> and here are some screencaps of her appearance (in case YouTube gets sued out of existence): [http://www.zephoria.org/thoughts/archives/2006/03/30/tonite\\_on\\_oreil.html](http://www.zephoria.org/thoughts/archives/2006/03/30/tonite_on_oreil.html) -- Joebeone ([Talk](#)) 14:48, 11 April 2006 (UTC)

- **Keep** danah is all over, so this seems silly to delete here at wikipedia. She is a leading authority about all sorts of social and internet topics, and there are people who want to look up her accomplishments and information about her. -- Mary Hodder 14:39, 11 April 2006 (First and only comment ever posted by [User:128.111.166.190](#), 15:40, April 10, 2006)
- **Keep** This can hardly count as a vanity page. boyd is a committed, articulate, insightful and prolific scholar and public intellectual on the topic of networked social communities. It's hardly relevant whether a friend created a page or not. --Julian Bleecker 14:47, 10 April 2006 (Posted by [User:Jbleecker](#), 15:48, 10 April 2006)
- **Keep** As the talk page shows, we went some rounds on this and figured that this is an interesting border case in terms of notability. I did some additional research and found relevant cites that I believe makes the case for her being notable and she definitely passes [WP:PROFTTEST](#) (which is a *proposed* policy). Of course, I think that danah would agree when I say Wikipedia would not be much of a different place without this article... but I could have sworn that the standard was to err on the side of inclusion for borderline notable cases. -- Joebeone ([Talk](#)) 22:16, 11 April 2006 (UTC)

**Later:** I should be clear: I would hate to see that the fact that someone like myself, a friend and colleague, edited her article would lead to it being deleted. I can commit to not editing it, if that would help. I did some more poking around on Lexis and found at least one other news article from a major paper that is a profile

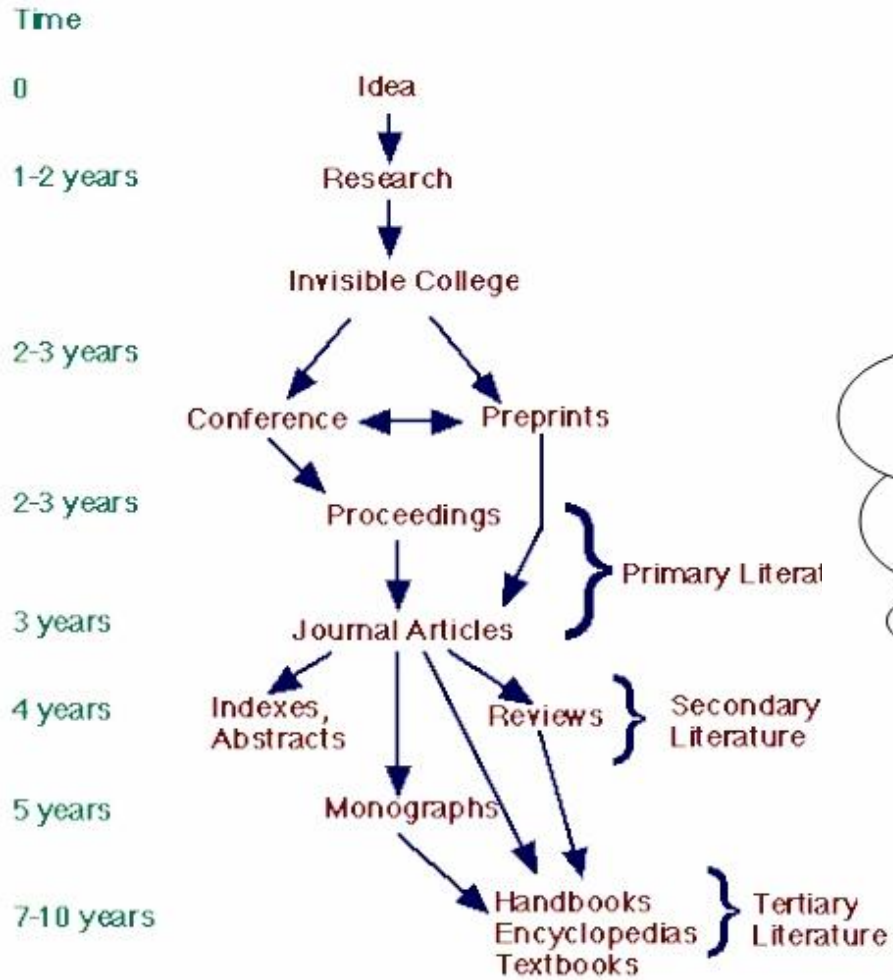

Discussion on the "to delete or not to delete" decision

# Wikis vs. The Blog

- A wiki can be a blog, but a blog does not have to be a wiki (indeed, very few blogs are wikis)
- Wikis promote content over form
- Blogs promote form over content (form is chronological)
- They share a lot, however: `trackback`, `syndication`, etc.

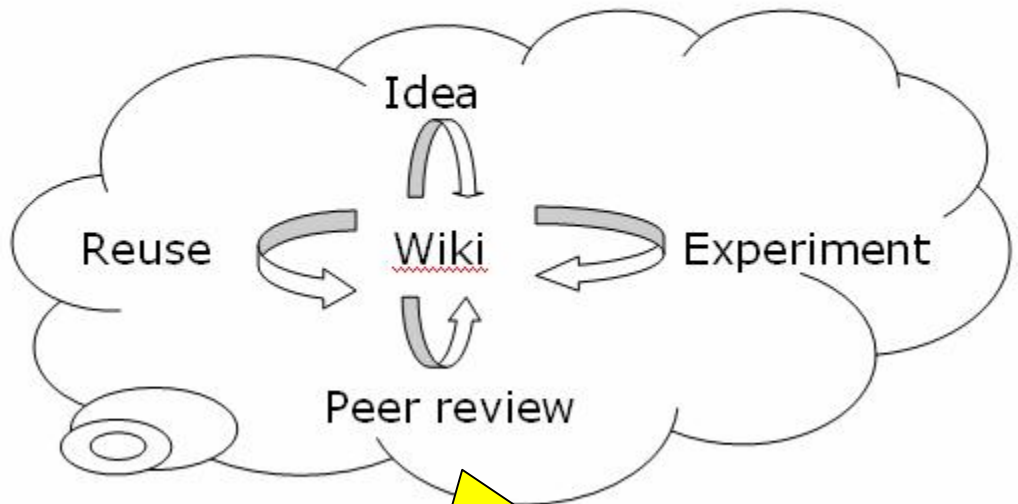

# Wikis – library implications

## Structure of Scientific Information

Scholarly communications:

Author → Publisher → Article

In the future, will scholarly communication happen within wiki spaces?

# Wikis – library implications

- Faculty teaching
- Group projects
- Ongoing research

Where is the librarian? Where are the library resources?

- Uses inside the library include: documentation, procedures, answers to repeated reference questions, and more!

# Folksonomies (tagging)

- User-supplied “cataloging” and “collection building”
- Folk taxonomy = Folksonomy
- Collection sharing
- Ground-up, not top-down
- More responsive to current trends, terms, jargon, etc.
- Aggregates many individual decisions so that useful patterns emerge
  
- Tagging applied to:
  - Bookmarks
  - Photos
  - Book collections
  - etc

# Social bookmarking

- Shared internet bookmarks
- Often accessible to anyone (although some bookmarks can be password protected)
- Social bookmarks are often assigned informal user-defined *keywords* or tags (e.g. folksonomies)
- Bookmarker can sometimes comment or provide an abstract of bookmarked site
- “Cloud tags” show popularity of tag terms; “the marketplace” decides which are “adopted” in practice
- Examples: Unalog, del.icio.us, Technorati

# Social bookmarking – del.icio.us

**INTERNET ACTIVITY INDEX**

Share of Time Spent Online

	Jan06	Feb06	% Chg
Commerce	18.1%	18.3%	+1.1
Communications	43.3%	42.4%	+2.1
Content	33.7%	34.3%	+1.8
Search	4.9%	5.0%	+2.0

Source: OPA and Nielsen/NetRatings

**February Findings**

- After a January post-holiday decline, Commerce's share of time increased slightly in February due largely to two seasonal events: Valentine's Day and 2006 income tax filings.
- Content experienced its largest increase in share of time since June 2005 and Contents reach (percentage of all population engaged in this activity) hit a new high of 87.9%. The record-setting east coast snowstorm, Winter Olympics and the Muhammad cartoon controversy inspired Content consumption.
- Search's share of time grew to a new high, leading to increases in Content and Commerce's time share.

## All about CiteULike

Read all about it

CiteULike is a free service to help academics to share, store, and organise the academic papers they are reading. When you see a paper on the web that interests you, you can click one button and have it added to your personal library. CiteULike automatically extracts the citation details, so there's no need to type them in yourself. It all works from within your web browser. There's no need to install any special software.

Because your library is stored on the server, you can access it from any computer. You can share your library with others, and find out who is reading the same papers as you. In turn, this can help you discover literature which is relevant to your field but you may not have known about.

You're currently looking at a list of the last few papers submitted by all the CiteULike users. Why not [register](#) for a free account today and start organising your collection and see just the articles you're interested in? All we need is your email address, a username, and a password. It should take less than fifteen seconds.

Alternatively, you can read [more about CiteULike](#).

## Lolita Censorship History

A PennTags Project by oliviajl

tagged Censorship Lolita by oliviajl ... on 25-JAN-06

---

**20th-Century American Bestsellers** copy

Helpful student project with notes on the original book, its initial and subsequent reception, and a critical essay.

tagged Censorship Lolita by oliviajl ... on 25-JAN-06

---

**CNN - Nabokov - Lolita's Impact** copy

A 1999 article exploring the controversy behind the censorship of *Lolita*. Chronicles its initial printing in France, followed by its two-year ban shortly thereafter, and ultimately its overwhelming success in the U.S. following its 1958 publication:

"Lolita" was an enormous success, the first book since "Gone With the Wind" to sell 100,000 copies in the first three weeks of publication. The lack of outrage over the book in America might be attributed to the tenor of the times: sex, and even teen sexuality, was 'in.' Elvis Presley was gyrating to the top of the pop charts and films like "Blackboard Jungle" were glamorizing youth and even juvenile delinquency. Parents were uneasy, but they had more glaring affronts to middle-class values to worry about. "Pedophile" was not a term one read in the morning newspaper. A cynic might add that "Lolita" is a complex and often tricky book, and that only the most fanatical Philistine, intent on ferreting out every incidence of filth, was likely to read it to the end.

tagged Censorship Lolita Nabokov Pornography by oliviajl ... on 25-JAN-06

---

**JSTOR: Cardozo Studies in Law and Literature: Vol. 4, No. 2, p. 289** copy

Essay confronting the issues of censorship and morality. Includes discussion of many popular, and (once) controversial books including *Sister Carrie*, *Ulysees*, *An American Tragedy*, and *Lolita*. Chronicles many arguments against provocative writing, including: "How, sirs," asked the district attorney [in the trial regarding *An American Tragedy*] "would you like to have your fifteen-year-old daughters read that?"

# Photo sharing – library implications

- Collection development
- Archiving / preservation

# RSS

- XML-format protocol (not software or website)
- RSS, Atom, etc. – means to syndicate content
- Computer to computer exchange
- Makes subscriptions (and auto-updates) possible
- Sharing of content
- Microcontent
- Portal (“channel”) into another info-space
- User-customizable (control)
- Allows the weaving together of the blogosphere, as well as “mashups” of many of these social software applications
- “Result Set Syndication” – Walter Lewis @ code4lib  
2006

# RSS

# RSS – uses in libraries

- Push content to users
- Re-purpose content within library/patron learning environments
- Current examples:
  - New books RSS feed
  - Journals tables-of-contents feeds
  - Events and programs
  - Library news
  - Current awareness (“SDI”)
- Collection development implications

# RSS - new books @ TCNJ

The screenshot shows a Mozilla Firefox browser window displaying the SOCS (Syndication and Open Content System) interface for TCNJ. The browser's address bar shows the URL: [https://socs.tcnj.edu/per/s4\\_course-syndication.pl?session=18dduwjyfa6rh1ugclo&displaydescriptions=on](https://socs.tcnj.edu/per/s4_course-syndication.pl?session=18dduwjyfa6rh1ugclo&displaydescriptions=on). The user is logged in as Edward Corrado (N/A Unread).

The interface includes a navigation menu on the left with options like Welcome, Administrator, Grading, E-mail, Resources, Discussion, Dropbox, Assessments, C-DOCS, Logged Chat, Calendar, and Syndication. The main content area is titled 'Syndication' and features a 'Manage RSS Channels' section with 'Display feeds: 5' and 'Show Descriptions: ON OFF'.

Below this, there are two sections of book feeds:

- TCNJ Library - New Literature Books**:
  - [Red queen : a transcultural tragicomedy /](#) (THU, 13 APR 2006 15:49:13 EDT)
  - [Da Vinci code : a novel /](#) (THU, 13 APR 2006 15:33:03 EDT)
  - [Blues for an Alabama sky /](#) (THU, 13 APR 2006 15:29:44 EDT)
  - [Old settler /](#) (THU, 13 APR 2006 15:18:01 EDT)
  - [House arrest : a search for American character in and around the White House, past and present /](#) (THU, 13 APR 2006 15:00:32 EDT)
- TCNJ Library - New Computer Science Books**:
  - [First course in computational physics and object-oriented programming with C++ /](#) (THU, 13 APR 2006 12:28:01 EDT)
  - [Diccionario comentado de terminología informática : unificación racional de términos, anglicismos y galicismos, pautas de traducción, semântica in](#) (FRI, 07 APR 2006 14:05:56 EDT)

At the bottom of the browser window, an email client interface is visible, showing an email from [corrado@tcnj.edu](mailto:corrado@tcnj.edu) with the subject 'Success of open source /' and the body text: 'Success of open source / Steven Weber. Location: General Collection. Call Number: QA76.76.S46 W43 2004'.

The Windows taskbar at the bottom shows the Start button and several open applications, including Internet Explorer, Microsoft Word, and various web browsers. The system clock indicates the date is 11/14/2005 and the time is 10:59 AM.

# Podcasting

- RSS + MP3's = podcasting
- Audiofiles (mostly MP3s)
  - Napster, iTunes, Rhapsody, etc.
- Some videofiles
  - iTunes, Desperate Housewives \$1.99/episode
- “Information space” to find, locate, download, buy, subscribe to updates
- XML metadata files
- Ground-up
- Low-barrier
- Less collaborative than other social software
- One-to-many, not many-to-many

# Podcasting – library implications

- There's Something in the Air: Podcasting in Education

GARDNER CAMPBELL

Podcasting is taking its place among the dizzying variety of grassroots media now available to everyone. Those in higher education need to understand the potential uses and value of rich media authoring, bringing podcasting into courses so that students can lift their learning to a whole new level.

## Digital Technologies in Courses - Spring 2006

The following instructors have confirmed plans for using digital technologies during the Spring 2006 semester as part of the Duke Digital Initiative. Some instructors will have students use iPod devices in their courses, while other instructors will use iPod devices in instructional activities that do not involve student use of iPod devices. Additional courses may be added to this during the course of the semester. Course descriptions are listed below the table listing and are linked with the table.

Course Listing	Course Title	Instructor
AALL 170	Indian Cinema	Satendra Khanna
COMPSCI 1	Principles of Computer Science	Jeffrey Forbes
CULANTH 196S	Senior Distinction Seminar	Richard Collier
CULANTH 180.02	The Arts and Human Rights	Louise Meintjes and Catherine Admay
DOCST 155S	Intermediate Audio Documentary	John Biewen
DOCST 100S	Children and Illness	John Moses
EDUC 152S	Civic Engagement and the Duke-Durham Neighborhood Partnership	Jennifer Ahern-Dodson
EGR 165.02	Rebuilding From Ruins	David E Schaad
ENGLISH 117FS	Spiritual Autobiography	Christina Askounis
FRENCH 62	Intermediate French Language & Culture	Laura Florand

# Podcasting – library implications

- Library tours
- Tutorials
- Implications for collection development
  - How to provide student access to faculty lectures?
  - How to point students toward quality podcast information?
- Uses in the classroom (physical and virtual)
- Distance Learning / e-Learning
- Audio reserves
  
- “Software Above the Level of a Single Device” – vertical interrogation -- Web 2.0 design patterns -- Tim O’Reilly
  - iTunes web site with huge database
  - Desktop MP3 file and metadata manager
  - Portable handheld player

### Profiles

Think of your profile as your personal page on Friendster. It includes some photos and a description of yourself, who you're looking to meet, and information about your favorite music, movies, and books.

In addition, it contains links to all your friends' profiles. If you're using Friendster only to stay in touch with your immediate friends and aren't looking to meet new people, you can hide your profile from everyone but your immediate friends.

But, if you're looking to expand your social network, you can allow other members to peruse your profile and even send you a message if they're interested.

#### Want More?

Check out some of our current member profiles and see for yourself.

### About me:

I edited my profile with [Thomas Mvspace Editor V3.6!](#)

The [Donald G. Butcher Library](#) is centrally located on the [Morrisville](#)

# Creative Commons

- Not social software per say, but does allow for sharing of content
  - Articles
  - Presentations
  - Art (including photos)
- Different Creative Commons Licenses exist, some limit what people can do with content
  - No corporate use
  - Share and share alike

License + XML script for announcing the license and for remote “findability” + CC database of CC-registered content

# Life caching

- Cell phones
- Blogs
- Digital cameras and photo sharing
- GPS indicators
- Friend networks
- Chat and text message
  
- “Screenagers”
- Pew survey shows “mounting evidence that teens are not passive consumers of media content ... they take content from media providers and transform it, reinterpret it, republish it, take ownership of it in ways that at least hold the potential for subverting it.”
  - » Pew Internet and American Life Project, Nov 2005

# What do all these have in common?

- Easy of use – “If I can’t figure it out in two minutes, it’s not worth my time.”
- Flexibility, re-usability
- Community
- “Less than a decade ago ... people described the act of going online as venturing into some foreign realm called cyberspace. But that metaphor no longer applies. MySpace, Flickr and all the other newcomers aren't places to go, but things to do, ways to express yourself, means to connect with others and extend your own horizons. Cyberspace was somewhere else. The Web is where we live.”

# Social software and Web 2.0

- **Participative:** *Web 2.0 is participative ... Web 2.0 applications have been quick to spot the value of user-generated content.*
- **Modular:** *Web 2.0 applications are modular, with developers and users able to pick and choose from a set of interoperating components in order to build something that meets their needs.*
- **Sharing:** *Web 2.0 is about sharing ... content and ideas.*
- **Communication:** *Web 2.0 is about communication and facilitating community.*
- **Smart:** *Web 2.0 is smart; applications will use knowledge of us ... to deliver services that meet our needs.*
- **Trust:** *Web 2.0 is built upon trust ... placed in individuals ... or in the users and reuses of data.*

Why do we need to care?

# Horizon Report 2006

- “Already in common usage outside of the educational arena, social computing practices are cropping up on campuses with increasing frequency.” p. 8
- “Collaboration is increasingly seen as critical across the range of educational activities, including intra- and inter-institutional activities of any size or scope ... knowledge is becoming a community property, and the construction of knowledge is becoming a community activity ...” p. 4

# Educating the Net Generation (2005 EDUCAUSE)

“Net Geners use technology extensively to network and socialize. In their personal lives, buddy lists, virtual communities, and social networks such as Flickr or Orkut are heavily used. “Then we poll users about what they actually do with their computers, some form of social interaction always tops the list -- conversation, collaboration, playing games, and so on. The practice of software design is shot through with computers-as-box assumptions, while our actual behavior is closer to computer-as-door, treating the device as an entrance to a social space. ” p. 2.12

» Educating the Net Generation,  
2005 EDUCAUSE

# Millennials (these are our users!)

Millennials (or NextGens) are:

- Format agnostic
- Nomadic
- Multitasking
- Experiential
- Collaborative
- Integrated
- Principled
- Adaptive
- Direct

» Abram, Stephen, and Judy Luther. *Born with the chip*. *Library journal*, May 1, 2004. pp. 34-37.

# Why do we need to care?

It doesn't matter whether we "accept" folksonomies, *because we're not going to be given that choice*. The mass amateurization of publishing means the mass amateurization of cataloging is a forced move.

[we will not] get to choose *whether* folksonomies spread, but ... we might be able to affect *how* they spread, by identifying ways of improving them as we go.

... we are not driving a car, with gas, brakes, reverse and a lot of choice as to route. We are steering a kayak, pushed rapidly and monotonically down a route determined by the environment. We have a (very small) degree of control over our course in this particular stretch of river, and that control does not extend to being able to reverse, stop, or even significantly alter the direction we're moving in.

» [many.corante.com/archives/2005/01/22/folksonomies\\_are\\_a\\_forced\\_move\\_a\\_response\\_to\\_liz.php](http://many.corante.com/archives/2005/01/22/folksonomies_are_a_forced_move_a_response_to_liz.php)

# Why do we need to care?

... we can consider the functional areas of linking, reference management, and weblogging to be service points on a single continuum of information gathering, study, and creation.

» [www.ariadne.ac.uk/issue40/chudnov/](http://www.ariadne.ac.uk/issue40/chudnov/)

And sharing!

This is scholarship.

# Why do we need to care?

“ They're turning our old ideas of privacy on their head. The users of MySpace think nothing of putting pictures of themselves on the Internet, keeping a public journal of their days and nights, making their friends known to the world. Our old ideas about privacy no longer apply to a lot of Internet users. That's just a fact.”

» [www.msnbc.msn.com/id/12013797/site/newsweek/](http://www.msnbc.msn.com/id/12013797/site/newsweek/)

# Why do we need to care?

“A new vision: everybody is a librarian.

What’s my job? Help people build their own libraries.

What does a library do?

- Make our library work
- Help make their libraries work
- Make it all work together”

Dan Chudnov, Yale

» [onebiglibrary.net/files/20060411-cwml-social-computing.pdf](http://onebiglibrary.net/files/20060411-cwml-social-computing.pdf)

# What to we need from our vendors?

A new vision:

- Platforms, not software
- Capabilities, not features
- Openness and flexibility
- Expect the unexpected
- API's, web services, loosely coupled systems
- Leverage the immediate user-base for innovation
- Appropriate from the larger user-base for innovation

# Social software and libraries

- Edward Corrado, TCNJ
- Jim Robertson, NJIT

Endeavor User Group Annual Conference,  
Apr 20-22, 2006 (Session 43)

# Thanks!
